

Chemical Process Engineer

VitalFluid is a young dynamic company specialized in the field of Plasma Activated Water (PAW). PAW is a relatively new phenomenon and is produced only by making use of water, air and electricity. The properties of PAW can be used in agriculture, medical applications and water purification. VitalFluid focusses on the development and commercialization PAW technology for the treatment of seeds and for sustainable crop protection.

VitalFluid is looking for a chemical process engineer to strengthen our R&D team. Do you want to be at the center of upscaling, improvement and implementation of our green PAW technology? Combine your passion for process technology and proactive attitude and join our team!

Location: Eindhoven/Veldhoven

Tasks

- Upscaling and improvement of the PAW activation process;
- Development of innovative reactor designs for testing purposes;
- Optimization of the water gas interface to improve transfer from gas to liquid phase;
- Analytical measurements of components in PAW and plasma activated air;
- Development of prototypes and execution of tests;
- Convert developed prototypes into a production ready concept;
- Maintain contact with cooperating universities and partner companies.

Job Requirements

- Master's degree in chemical process engineering or chemistry;
- Knowledge and experience of optimization of gas-liquid interfaces (water-air);
- Knowledge and experience with plasmas;
- Affinity with water treatment is a pre;
- Starters and candidates with experience are invited to apply.

Your competences

- Working proactive in a small dynamic R&D oriented company;
- Creative and innovative in designing solutions;
- Promoting opportunities for process innovation;
- Keep on track with technology developments that might impact the competitiveness of VitalFluid.

What we offer

VitalFluid offers an exciting opportunity to contribute to new sustainable technologies that will make our world better. We offer a competitive package of conditions, a good salary and a great company culture. You also can develop yourself along with our growing organization.

- A challenging function and an informal working setting;
- The opportunity to develop yourself and your competencies;
- Working on a game changing technology with a massive impact on sustainable agriculture.
